
3 - Proposal for a pamphlet showing routes around the Santos estuary fortifications

The pamphlet shown here, with images on the front and back, is set up to be printed on an sheet of paper, in color or black-and-white. It should be folded twice in order to fit into a purse or a pocket. Just copy the images and enlarge them to A4 size, in "landscape" format.

The suggested itineraries in the folder begin at the Casa do Trem Bélico, the old Fort Augusto (Fishing Museum), and the Santo Amaro Fortress. Their objective is to allow visitors to enjoy other historical-cultural attractions near these colonial fortifications.

When reproducing this pamphlet, add a message supporting Heritage Education

The script historic center of Santos was created by Profª. Dra. Wilma Therezinha Fernandes de Andrade in 1964 and is still held by the students of History/Unisantos. In 2015 was part of the program of the Week of Martins Fontes, the Santos Academy of Letters.
